

Task information for contributing a task to the Movement Imagery Ability (MIA) platform

Complete this form for the initial review. The information will also be used to prepare the website entry if the task receives acceptance for inclusion in the MIA platform.

1. Task identity and references

Full task name *	
Abbreviation *	
Preprint URL optional	
Published paper URL or DOI *	
Short reference * e.g., Author et al. (2026)	

2. Task information shown on the website

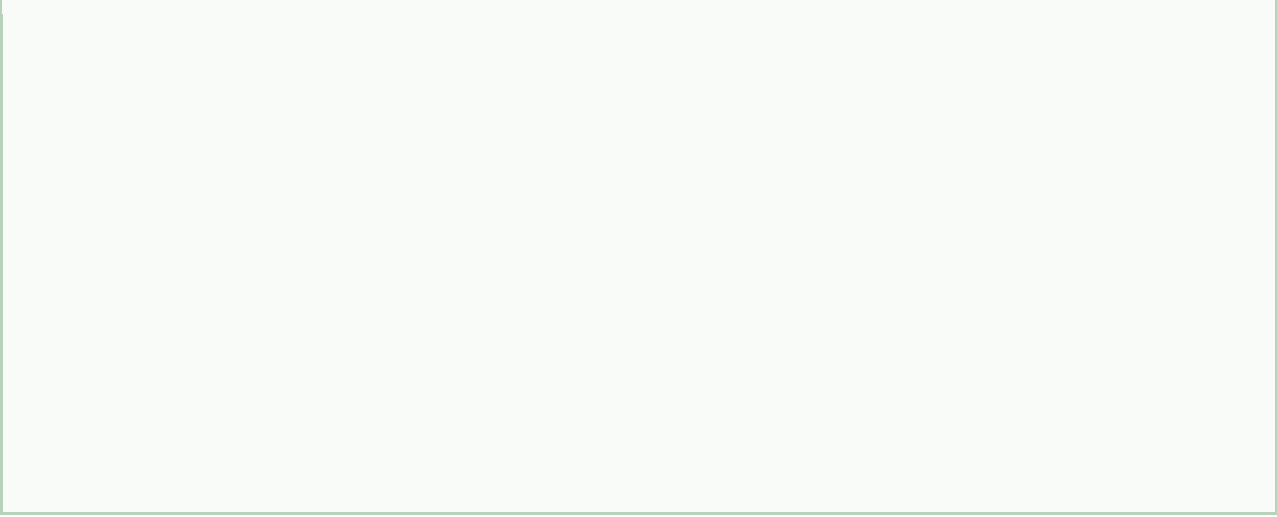

Task type * e.g., Mental Chronometry	
Movement imagery dimension(s) * Identify primary dimensions	
Main measure(s) * Keep concise	
Imagery instruction * e.g., Explicit: IVI + KIN	
Relevant exclusion criteria * Write None if there are none	
Required equipment *	
Approximate duration * e.g., 10–15 min	

3. Task description

Recommended length

Current task entries use 2–3 short paragraphs including the task purpose, scientific basis, task procedure and task design. Write for readers who may not know the task. Include short in-text references where relevant.

Write about 130–180 words

4. Task image

Submit an image illustrating the task (example visual stimulus and/or procedure) as a separate file. The website displays a cropped 180 × 140 px preview. A square PNG or JPG of at least 400 × 400 px is recommended.

☐ I have the right to provide this image for use on the MIA website.

Ready for the initial review? After successful self-screening for initial fit of the task, send this completed **task information form** (including the task image), the **[task fit checklist](#)** and the **peer-reviewed article** to the corresponding author of the MIA platform [✉](#).

The MIA team will assess task fit and evidence before asking you to prepare the repository.
