

Task information for contributing a task to the Movement Imagery Ability Task (MIAT) platform

Complete this form for the initial review. The information will also be used to prepare the website entry if the task receives acceptance for inclusion in the MIAT platform.

1. Task identity and references

Full task name *	Click or tap here to enter text.
Abbreviation *	Click or tap here to enter text.
Preprint URL optional	Click or tap here to enter text.
Published paper URL or DOI *	Click or tap here to enter text.
Short reference * e.g., Author et al. (2026)	Click or tap here to enter text.

2. Task information shown on the website

Task type * e.g., Mental Chronometry	Click or tap here to enter text.
Movement imagery dimension(s) * Identify primary dimensions	Click or tap here to enter text.
Main measure(s) * Keep concise	Click or tap here to enter text.
Imagery instruction * e.g., Explicit: IVI + KIN	Click or tap here to enter text.
Relevant exclusion criteria * Write None if there are none	Click or tap here to enter text.
Required equipment *	Click or tap here to enter text.
Approximate duration * e.g., 10–15 min	Click or tap here to enter text.

3. Task description

Recommended length

Current task entries use 2–3 short paragraphs including the task purpose, scientific basis, task procedure and task design. Write for readers who may not know the task. Include short in-text references where relevant.

Write about 130–180 words

Click or tap here to enter text.

4. Task image

Submit an image illustrating the task (example visual stimulus and/or procedure) as a separate file. The website displays a cropped 180 × 140 px preview. A square PNG or JPG of at least 400 × 400 px is recommended.

☐ I have the right to provide this image for use on the MIAT website.

Ready for the initial review? After successful self-screening for initial fit of the task, send this completed **task information form** (including the task image), the [task fit checklist](#) and the **peer-reviewed article** to the corresponding author of the MIAT platform [✉](#).

The MIAT team will assess task fit and evidence before asking you to prepare the repository.
